

On the Subject of 9000

What does the power scouter say about his power level?

You have been given a powerful opponent, and in order to take them down, you must submit the right combination of sounds to launch your attack.

To aid you in finding the right combination, a total of four pictures out of five symbols will be presented on the module.

- For every Turtle present, select "KA - ME"
- For every Staff present, select "HA - ME"
- For every Tail present, select "HA"
- If Stars are present, repeat the selections 2 times for every set of stars

The Z clause

If there is a Z present, the order of the selections will be altered from the original sequence. The original sequence goes as follows: **Turtle selections and Staff selections alternate, followed by any Tail selections, then repeat the sequence for the number of Stars present.**

The changes to the sequence will be as follows, based on the first rule that applies:

- If the Turtle is present in the top left, replace all staff selections with ME - KA
- If the Turtle is present in the top right, change any second sound in a selection so that it matches the first. [HA - ME becomes HA - HA]
- If the Staff is present in the bottom left, replace all turtle selections with ME - HA
- If the Tail is present in the bottom right, reverse the entire sequence.
- If only Stars are present, enter sequence: HA - ME - HA - ME - KA

Four of a Kind

There is a small chance that all of the symbols will be the same. Enter the solution as follows, ignoring all above rules:

- Turtle/Staff: KA - ME
- Tail: KA - ME - HA
- Star: KA - ME - HA - ME - HA
- Z: Enter whatever you want! As soon as your sequence is complete, the module will be solved.
